

How to create a profile and apply to a market in MangeMyMarket.

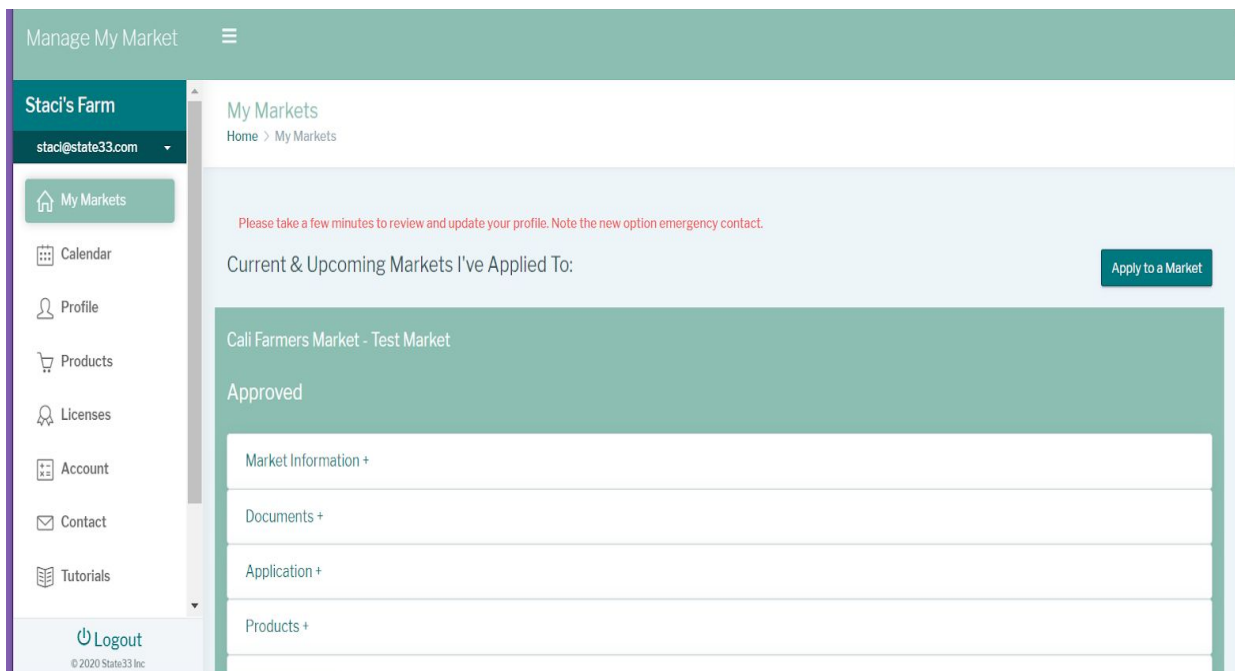

Go to: managemymarket.com

Create a profile→**add your products**→ **apply to market(s)**. The primary advantage of our **vendor profile** is that you fill it out only once, and then use it repeatedly to apply to different markets.

1. If you are a *new vendor* applying to a market, click on **Register** to get started. The program will ask you if you are a vendor or manager - select vendor!

If you are a *returning vendor* simply log into your existing account and click **Apply to a market**-->select the market of your choice, answer the market's questions-- >submit

***You may update your profile/products anytime and all markets you have applied to will be updated.**
